

PDC CONTRACT SLEEVING SERVICES

From Prototype Samples To Production Runs, PDC Can Handle All Facets Of Your Shrink sleeving Project For You!

PDC International's broad experience with shrink sleeve labeling is based on work with thousands of applications. With over 35 years of experience throughout the Americas and Europe, our substantial technical knowledge will insure that your package looks its best and that your expectations are met and exceeded.

PDC offers **Contract Sleeving Services** in our Connecticut facility which can help you in every phase of your sleeving project including:

- Development of your package
- Selecting film type and grade
- Making samples for test markets
- Making sales samples
- Supplying production quantities on an ongoing basis

Our in-house production line has a complete range of equipment capable of shrinking even the most difficult shrink sleeve labels.

- Sleeve Applicators
- Hot Air and Radiant Shrink Tunnels
- Steam Shrink Tunnels

PDC Contract Sleeving Services can use either pre-cut sleeves or roll stock, which saves you label cutting costs. The **PDC Resource Group** has the technical knowledge and facilities to insure the success of your project.

THE POWER BEHIND THE PACKAGE

**SHRINKSLEEVE LABELERS • TAMPER EVIDENT NECK BANDERS
MULTIPACKERS • SHRINK TUNNELS • STRETCHSLEEVING • CONTRACT SLEEVING**

PDC SLEEVING SOLUTIONS

FROM CONCEPT TO PRODUCTION PDC QUALITY & COMMITMENT

When you partner with PDC, you gain much more than the finest and most reliable shrinksleeving and shrinkbanding systems. You receive PDC's total "Sleeving Solution", which includes:

- Analysis of your packages
- Expert advice on material selection
- Shrink testing and sample preparation
- Line layouts and integration
- Complete documentation
- Operator and maintenance training
- And the dedication of our entire technical team!

Working with PDC is a guaranteed choice to make your project a success!

TAMPER EVIDENT BANDING

PDC's full line of rugged tamper evident banding machinery assures product integrity -- the highest priority with today's safety-conscious public. Tamper-evident banding also serves multiple purposes by imprinting ingredients, nutritional information or UPC codes around the package.

SHRINKSLEEVE LABELING

PDC manufactures a complete and durable line of shrinksleeve labeling machinery, with a broad range of speeds and capabilities. Shrinksleeve labels wrap and conform to a container's every curve, enabling complete decoration of unusual shapes -- from top to bottom and 360 degrees around.

SHRINK TUNNELS

PDC manufactures a wide range of heat tunnel models to meet every shrink sleeving application. Fabricated to the highest standards, our shrink tunnels are all made of heavy gauge stainless steel and employ top quality control systems that maintain highly precise temperature control.

For high-speed applications, two or more tunnels might be used in sequence, and for special applications, a pre-shrink or post-shrink unit could be used with the tunnels.

- Hot Air - Convection
- Radiant - Infrared
- Steam

MULTI-PACKERS

PDC offers a number of machine models for Multipacking or Twin Packing. Used most frequently when the bottles or packages are of similar dimensions.

Call Us Today And See What PDC Can Do For You!

Count on PDC for consistent performance, optimum efficiency and maximum line uptime.
